**How Carmagic® works**

This is the effect of Carmagic® - Working on surface tensions; it wets & envelops dirt into damp floating encapsulated blobs, placing them microscopically off the surfaces. The blob becomes fully lubricated. Now it needs to be sucked up. So, a chamois merely sucks it up, and a chamois is wholly soft and pliable to stay close to the surface. Toweling without artificial fibres is also great for larger molecules on wheels and heavier dirt along the bottom chassis line of cars.

**ABOUT CARMAGIC® SPRAY & WIPE FOR CARS:**

- It has been quietly used in Porsches, Ferraris and Mercedes for five years prior to its public launch. It is used for both inside and outside of cars.
- It is designed to work with a chamois as it sucks liquids the best because it has great absorbing properties. The softer and more dimples and holes, the better. The more expensive, the better. It is cheaper than microfibres and is reusable.
- It evaporates fairly rapidly and there is absolutely no water marks left behind if you missed wiping off little droplets.
- It does not contain any alcohol of some kind and does not leave any water resi-

due which is evident on your glass windows unless you have not rinsed and wrung dry your chamois enough.

- Is absolutely recommended for all your car cleaning needs; it can clean Satnav screens, control knobs, Perspex, carbon fibre, glass, mirrors, all leathers and vinyl. Cloth seats need the very lightest and finest spray droplets.
- For already cracked vinyl dash, Carmagic® can clean without hastening its destruction.
- You can clean your sunglasses or spectacles with it too. Remember, Carmagic® has anti-static, anti-dust properties.

I have been a professional commercial cleaner for many many years and have found Magic Auto Spray & Wipe excellent for all types of cleaning. I have found it leaves no smears on the surfaces which many of the other powerful cleaners tend to do. I am amazed at the product and would even highly recommend it for heavy duty cleaning. I now continuously use it, not only the cars but also in my commercial jobs. **Margaret Robinson**, c/o Crns Professional Cleaners. FNQ.

Charles, you have done it again! The bonnet and roof of my Porsche 944, although shiny, were still bothering me because of the baked in watermarks and oxidisation evident. After using the Magic Watermarks remover they are now looking as if this 22 year old car has just come off the showroom floor. Definitely easier to use than a claybar and probably more effective. Thank you again, **Brian**

As we market a high profile product, we pride ourselves on presentation. So your product works particularly well when we return to the showroom after a demonstration. A quick spray and wipe and the demonstrator car looks new. Even better there is no residual water effects i.e. water marks or drops to stain our showroom floor tiles. Congratulations on this great product, which we will continue to use and endorse. Yours Sincerely, **Warwick Stansfield**, General Manager, Porsche Centre Brisbane

Charles, Congratulations on ruining my life! I used to spend hours washing my 1984 Porsche 944 and then more hours drying and buffing off watermarks. It was a labour of love and I enjoyed it. Alas! This is not possible anymore. Since starting to use Magic Wash I have spent just 15-20 minutes

Charles After finally trying your Magic Car Wash, I was amazed how quickly I was able to clean my vehicle. It may not have been in 16 minutes, but after a few washes I'm sure I can get to that time. The ease of use of the product is just amazing. I have tried other "waterless wash" products but they contain waxes and left residue in places I couldn't get to and were more expensive. Go figure. I have been waiting for a Waterless product that I am comfortable using to offer as a service with my business and do my part for saving water. Thank you once again Charles. - **Chris**, Invisi-Guard Car Care Services, [info@invisi-guard.com.au](mailto:info@invisi-guard.com.au)

on the car at a time. Maybe once every two weeks. What am I going to do with all the spare time? I think I'll just go for a drive. I will recommend Magic Wash to all my friends and work colleagues. Thanks mate, **Brian Smith** (Kewarra Beach [docsmith53@gmail.com](mailto:docsmith53@gmail.com))

Car Magic is just that - magic. It gets great results and is ideal for busy people like me because it is so quick and easy to use. It is also a great product because it helps to save water. Today every one is much more aware of the need to be use water wisely and using Car Magic only a bucket of water - no more hosing the driveway as well as the car! -- **Dr Lesley Clark** (Queensland Member of Parliament)

We currently use Magic Car Wash for the display vehicles in our showroom. Of course, our display vehicles must be immaculately prepared. I am happy with the performance, and the ease of use, of Magic Car Wash. Kind regards, **Bill Andrews**, EX-Sales Manager - DaimlerChrysler Sales Group, Mercedes-Benz Passenger Cars and Light Commercials, Chrysler, Jeep

## TESTIMONIALS

Quote from GT magazine .. new products

### WEB WATCH—IT'S MAGIC

If you go by the premise that the less time you spend cleaning a car the more time you will have to drive it, then the curiously-named Magic for Cars and Porsches could be for you.

Designed in Cairns, Australia, Magic boasts being the world's first and only pH neutral, non-petroleum 'waterless' spray for vehicle exteriors and interiors.

Given that hose pipe bans have already been introduced in some parts of the UK, a waterless car cleaner could be just the job for keeping your Porsche spotless this summer.

Working on the premise that water itself doesn't wash cars, but the shampoo that it is mixed with, Magic puts both of these ingredients into one product; simply spray it on to paintwork, wipe with a damp chamomise and your car is clean.

Similarly, Magic can be used on wheels, exterior trim and interior. We tested the product on our long-term 944 and were very impressed with the results. If you want a sparkling finish you may still want to add a layer of wax after finishing but for a

quick clean Magic worked superbly. Admittedly the company's website and the literature that accompanies Magic lacks the professional touch of its big budget competitors but we say that this innovative product is still well worth a try. One litre of Magic Car Wash costs about AU \$10, excluding shipping, and is available from [www.carmagic.com.au](http://www.carmagic.com.au) etc..etc.. ..

\*\*\*\*\*  
*At first I thought this product was far too good to be true but was expecting a lot from it. After the first wash with Carmagic I was amazed and not only did it meet my expectations it far surpassed what I ever expected. I don't have countless hours to spend washing my cars, I am concerned for the environment and like my cars looking good. With Carmagic I clean my car in 20mins instead of 2 hours, can dramatically reduce my water usage and get a 100% spectacular streak free clean. This truly is magic, I will never even consider going back to conventional car wash. I have showed many of my friends the product and they were just as amazed as I was!! The fact I can clean my car in the garage at night since no hosing is required is a major bonus also. Carmagic is truly magic! - Mitchel van der Weert, Christchurch, NZ*

**Carmagic® Spray & Wipe**

**—the No Scratching, No Chemicals, No Fuss way to wash your car.**

## About Carmagic® Continued...

- It is absolutely biodegradable that you can tip the rinsing water onto your flower bed as there are no petroleum products and chemical contents. It is child and pet safe, too, in case the dog chews through the bottle.
  - It can only remove recent and small splatters of tar and not old ones.
  - It also works best with classic cars, classic bikes and antiques. Antique surfaces are far, far more delicate and softer than car paint-work. That's how good this 'spray & wipe' is. Not wetting cars or bikes while getting washed is simply an amazing benefit too.
  - It is Mother Nature's natural technology for you as it cares not only the environment being no contaminants whatsoever and saving lots of water, but it can also reclaim back your family and leisure time.
  - It helps us save huge amount of precious water which is getting scarcer and scarcer as time goes by.
  - For performance and racing car owners - You chaps should know this - "A fast & safe car is one that can stop fast", Carmagic® WILL NOT remove the microns of brake pad molecules you religiously build up on your brake discs, and WILL NOT degrade any brake fluids. Temporary rust on discs, caused by wet washing, scours off your microns of brake layers
- you so carefully build up.
- It is also used by boat owners for cleaning the inside salty equipment.
  - It is safe to use over a dealer treated protectant over a car but generally the coating deteriorates unevenly on its own.
  - It was developed for the extremely high end cars, & had also to be gentle. ALL car owners who really care for their cars or the time spent caring for their cars can use it.
  - It is very affordably priced, so we can ALL benefit, not just the 'high enders'. Some users even say that it is too cheap. That proves the high satisfaction level of it.
  - When used separately with other car washing stuff in your garage, there is no conflict, only your conscience regarding their constituents as many things are a compromise. Ours just happens to be 'green'.
  - The world deserves and needs this invention, mainly for its many 'soft', 'gentle' and 'green' attributes.
  - This product is versatile - A car product that can be used nearly everywhere strongly indicates its powerful, but gentle and versatile characteristics. A happy Car Owner is also a happy Home Owner - it can maintain furniture and other household articles; it can be used on windows at home and even your sunnys and spectacles.

## What is Carmagic's stand out difference to other 'similar' products

Very different. Put it this way — If you were caught out in the desert, it would be miles safer to drink Carmagic® wash, than the radiator water. Spray or pour gallons onto plants and they will live!

## Using MAGIC WASH on OUTSIDES and INSIDES of CARS

### HOW TO USE

**You Need:** Just damp quality chamois—spray bottle—very dry toweling cloth—bucket of water.

#### Instructions:

**Note:** For heavy salt and heavy mud – Hose off gently, not penetrating gaps in car, let car dry.

1. **Spray** Carmagic® in a fine spray, on a section about 0.5 meter square. There is no need to wait. Start wiping almost immediately.
2. **Wipe** with chamois, turning chamois over to clean part with each wipe.
3. **Rinse** chamois in bucket of water often, wringing all water out leaving just a very slightly damp chamois.
4. **Continue** on other parts of car. Alloy wheels, chrome exhausts or really bad area at chassis line, use a dry toweling cloth.
5. **Change** water in bucket if too dirty for your liking.
6. For insects on bonnet, mirrors and outsides of windows, **wet** with Carmagic® **rub** with palm of hand until dissolved and **wipe** with damp chamois.
7. For internal vinyl and leather seats, **spray** extremely fine from a distance. Wipe with a damp chamois.

**Note:** Staining of chamois is normal—towels can be washed and reused.

### THAT'S IT!

Carmagic® provides a natural sheen. Solid carnauba wax is also recommended.

Single action streak free finish	Spraying of "Magic"	DIY toweling cloth	Damp chamois
car panels	light	no	recommended
ultra dirty car panels	heavier	recommended	possible
glass windows	very light	recommended	recommended
internal - cabin vinyl, satnav	very light	possible	recommended
wood, lenses, carbonfibre, linings	very light	possible	recommended
leathers, alsantra, conolly, etc.	very light	possible	recommended
perspex	light	possible	recommended
edges of wheels	heavier	recommended	no
alloy wheels	light/heavy	recommended	possible
exhaust, steel, stainless	light	recommended	possible
bullbars	light	recommended	possible
heavy stains	light/heavy	recommended	possible
tar marks	light	recommended	possible
insect marks	light	recommended	possible
mirrors	light	possible	recommended
diesel, gasoline car/boat exhaust marks	heavier/repeat	recommended	no
helicopter/aeroplane jet exhaust marks	heavier/repeat	recommended	no

**HOME USERS:** For antiques, lounges – use soft absorbent cloth; for mirrors, glass tables, kitchen tops, cabinets – use dry towel

## WHY USE CARMAGIC® Spray & Wipe

### ● Save a lot of precious water

With water shortages (and even restrictions in some areas), Carmagic® allows you to wash your average sized car anytime, anywhere with just one bucket of water without feeling guilty of wasting precious water.

### ● Free up your time for other pursuits

Carmagic® is very convenient and easy to use. Just spray neat on a dry panel, wipe with a just damp chamois one at a time and it takes just minutes to clean your car, anywhere, anytime, no puddle of water, no mess – dry garage. You will have more time just driving your squeaky clean car!

### ● Save money - very economical

Carmagic® can be used for the exterior and the interior of the car – no need for different cleaners for inside and outside. \$12.95 is about the same price as your earth-damaging car wash concentrate, but with our product you are way ahead, just counting the man hours saved, the water saved and the environment saved.

### ● Stop scratching your car

Water on its own will add scratches onto surfaces – so will power hosing. Being pedantic,

all car washing scratches a car - examined under a microscope. This is due to the traditional 'wild scrubbing action' of saturated dirty water into and onto the surfaces. Immediately wiping off dirt lifted by a lubricant eliminates the dirt being available to be re-scrubbed into the surfaces.

Carmagic® brings back the natural sheen of the paint, steels and alloys of your vehicles. It contains powerful natural lubricant which protects the waxes and paintwork of any surfaces. It is pH neutral which means it has no reaction to waxes and polishers; anti static and anti dust which mean dusts glide on without scratching the surface.

### ● Save the environment – green product

Not only does Carmagic® saves water, but it is made from all natural ingredients. It is pH neutral, non-petroleum, non-corrosive, biodegradable, "waterless" spray and wipe no hosing car wash for vehicle's exteriors and interiors. It is child safe and pet safe. Absolutely no petroleum distillates, silicone, abrasives, harmful chemicals or detergents to pollute our waterways. With Carmagic® you can see and smell the difference.

\*\*\*

See the difference - no mess - use it anywhere - no scratches

### Long Term Effects of Carmagic Spray and Wipe

- In 5 years of use, we have found that the car wax applications lasts a lot longer, due to its all important PH Neutrality.
- Leathers and vinyl treatments stay intact.
- Just drier, less 'cancerous' cars, all round.
- Unlike many cars washing 'lubricants', Carmagic® does not strip wax. This is why many "car washes" add liquid wax. These minute amounts do not last more than a few days. Liquid wax does not stick.
- Of course, in the long term you save all that water and labour amounting to quite a substantial, 'notional', if not hard cash, return on a very small investment.
