Effortless gleam
- AU 20 to 50 cents per wash session

Hydro-cellular wash for...
Wheels, Glass, Paint, Vinyl, Leather, Metals
One bucket of water, No watermarks, Save time, Repair the environment.

Can you & those that you can influence, help me repair this world?

ONE CHALLENGE

Each Sunday, can you,
without wetting the driveway,
without being unavailable for 2.5 hours,
without sweat and with ONLY ONE
bucket of water,
without flushing light & heavy poisons
into our drains,
without artificial polymers on car paints.

SPOTLESSLY CLEAN THE FAMILY CAR? No? - But -

- With a tiny change to your mindset, you can. Just like me and the growing thousands who do
- **IT'S SIMPLE YOU SEE** - with the correct lubricant mixed with the right amount of treated water, it becomes a Spray 'n Wipe just like you do with you glass kitchen tops.
- **THIS MODERN METHOD WILL SPOTLESSLY CLEAN YOUR AVERAGE SIZED CAR IN 16 MINUTES!!!**

You owe yourself, your family and the small matter of the world, to use it. \$12.95 refills is about the same as your earth damaging car wash concentrate, but with our product you are way ahead, just counting the man hours saved, the water saved and the environment saved.

Your children & our future generations will thank you. So will your car for keeping corrosion & silicones off its brakes, electronics & bodywork !

It's called '**STYLE MAGIC FOR CARS & PORSCHES**' as it has been quietly used on Porsches, Ferraris & Mercedes for 7 years prior to it's public launch. It is used for both inside & outside of cars.

FAQ's are at www.carmagic.com.au

September 2005 Australia

Standard Instructions

Tools - Damp quality chamois, Spray bottle, Dry towelling cloths, Small bucket of water.

Do not wet car, hose off gently only for heavy mud or salt, then let vehicle dry before applications.

- 1 LIGHTLY Spot Spray (do not drench) neat Magic on sections of about 0.5 mtr square. (There is no need to wait, start wiping almost immediately)
- 2 Wipe with lightly damp chamois over dirt, turning chamois over to unused parts to continue. Rinse regularly in water, Wring all water out leaving just every slightly damp chamois.
- 3 Alloy wheels, chrome exhausts or really bad areas at chassis line, use a dry towelling cloth.
- 4 Internal Vinyl and leather seats: spray extremely finely and from a distance. Wipe with a damp Chamois or towel.

Insects on windows (when wet with magic, rub palm over insect marks) then dry towel off.

Change water in bucket when too dirty for your liking.

Advanced Instructions (for water restricted regions)

Tools - One cup of water, and lots of towelling rags

- 1 Medium Dampen a towelling cloth with water; further adding some Magic solution onto that same dampened towel.
- 2 Spot spray the vehicle the same as above, Use the dampened cloth to over wipe the sprayed areas.
- 3 Now, Wipe dry with separate dry towelling.

That's it!

Notes

Using more than 150mls for an average unclean car, you may just be using too much.

Use the best Chamois if possible.

Use towels that have no man made "plastics", if possible, ALL towels are to be laundered and re-used.

Best under shade to reduce speed of natural evaporation, Keep Bottle of Magic tightly shut and in a cool area.

For soft topped cars - Once or twice a year, spray over fabric and just hose off, Let dry naturally.

Use with caution to use & contain 'Hot-Spray'!
Warning: 'Stainless' 'Grip' 'Pesticide' 'Control' 'Emissions'

You need a Quality Synthetic chamomile (Non-absorbent materials will not work). Vapo-Dry-Towelling, and a bucket of rinsing water for the chamomile. You may gently hose very heavy salt or mud off. Let car dry, then spray neat Magic a section at a time. Almost immediately, wipe 'just' damp chamomile to absorb lubricated dirt off. Turn chamomile over to continue, then keep up repeated rinsing of chamomile - Important. Always wring all water out leaving just a very lightly damp chamomile, as watered down Magic reduces its cleaning and sheening effects...

Stop Scratching Your Cars

- Fact 1** - Do you realise that water is not a lubricant, the 'wash soap' is. Water on its own WILL ADD SCRATCHES to surfaces. So will power hosing. Water DILUTES the concentrated lubricant and is a RINSER.
- Fact 2** - Magic wash IS the lubricant AND the water. The fundamental difference is that it only requires 3 to 6% of that precious 38,000 litres to DILUTE.
- Fact 3** - Being pedantic. ALL Car washing scratches a car; examined under a microscope. This is due to the traditional 'wild scrubbing action' of saturated dirty water INTO & ONTO the surfaces! (Immediately wiping off dirt lifted by a lubricant eliminates the dirt being available to be re-scrubbed into the surfaces)

Under the microscope, traditional washing causes 200 % more scratches than just wiping 'Magic 4 Porsches' across the surfaces. Even common sense tells you this.

- PH NEUTRAL
- NO REACTION TO WAXES & POLISHES
- ANTI-STATIC, ANTI-FOG
- NON-ALLERGENIC, NON-POISONOUS
- WATER SOLUBLE
- NATURAL MOTHER EARTH EXTRACTS
- A NATURAL ULTRA POWERFUL LUBRICANT - CANNOT SCRATCH
- MOLECULARLY SMOOTH & TINY
- PROTECTIVE SHEEN
- INSTANTLY BIODEGRADABLE
- SPECIALLY BREWED FOR CAR WASHES

Still the world's FIRST and ONLY, PH Neutral, non-petroleum Spray & Wipe Wash for Vehicles' Exteriors AND Interiors!

magic spray & wipe is so pure

.... you can grow plants with it

After finally trying your Magic Car Wash, I was amazed how quick I was able to clean my vehicle. It may not have been in 16 minutes, but after a few washes I'm sure I can get to that time. The ease of use of the product is just amazing. I have tried other "waterless wash" products but they contain waxes and left residue in places I couldn't get to and were more expensive. So far, I have been waiting for a Waterless product that I am comfortable using to offer as a service with my business and do my part for saving water. Thank you once again Charles.

Chris, [Chris, Guard-Car-Care-Services, Brisbane, info@guardcar.com](mailto:Chris@Guard-Car-Care-Services)

Charles, Congratulations on raising my life! I used to spend hours washing my 1994 Porsche 944 and then more hours drying and buffing off watermarks. It was a labour of love and I enjoyed it. Alas! This is not possible anymore. Since starting to use Magic Wash I have spent just 15-20 minutes on the car at a time. Maybe once every two weeks. What am I going to do with all the spare time? I think I'll just go for a drive. I will recommend Magic Wash to all my friends and work colleagues. Thanks mate, Brian Smith Kowara Road, kowara@icloud.com

Just a quick email to say thanks for the MAGIC WASH. I used magic wash to clean one of my work cars, without doubt the best car cleaning product I have ever used, don't think I will ever go back to the car wash again. Was able to clean sections of the car and had the spare time, didn't waste any water and saved approximately 50% on what I would normally spend at the car wash. Will definitely recommend MAGIC WASH to all my friends. Hope you have plenty in stock. Steve Cooper Kinross Regard, steve@kinross.net

Dear Charles, Thank you for the amazing sample of "Magic Wash for Porsche" (wax is extremely nice) (once you have a proper chassis (not synthetic), it was able to do my job in no time with just half a bucket of water, also the Nissan Xtra wife was amazed! - I think once you have a vehicle washed the first time - the magic wash as a cleaning maintenance for any vehicle saves extreme quantity of water, time and effort (no energy) - WELL DONE! Betty Nido W/Scapes Safaris betty@scapesafaris.com, CEO, W/Scapes Safaris, Doreen@scapesafaris.com W/Scapes Safaris, Doreen@scapesafaris.com

Dear Charles, Recently I had the opportunity to use Magic Car Wash for Porsche on my car, I was absolutely blown away by this product. The finish on my car is mirror like, and the product is so easy to apply for such amazing results. It only took 5 minutes to get my car looking as new. Being a busy working number my time is valuable and restricted for such activities as cleaning my car, but it is necessary to keep my car's appearance good as it is used as promotional tool for my company. Another plus in my water consumption is greatly reduced. Thank you Magic car wash for Porsches... I can wait to try more of your products. Regards, Kathy kathy@mid.com

Charles I have used your Magic Car Wash product now for three weeks and on three cars of different vintages. The fact that one bucket of water and magic wash saved me time, effort and indirectly money (water is not free these days) as well as being environmentally responsible at the same time is a definite A+. The product made washing the car less of a chore due to the short time it takes to strip back the shine that I worked so hard to achieve. It removes dirt and brake dust so easily leaving me with a streak free finish. Also, the fact that you use it on the entire vehicle and do not need to mask the glass areas is a bonus, as in the past I have had to rewash the windows after washing the car. Finally, this product has so many applications, the best and most effective being the greatest product to clean mirrors and the windows in the house. My wife has spent many hours trying to get the numerous windows and doors streak free. This can only happen with a bit of hard, back breaking effort. Now, it is as simple as getting a bucket of water, chemicals and the magic car wash, and in a couple of minutes the mirrors and windows are clean AND streak free. I have not even thought of this new job as a chore due to the ease of meeting my wife's daily standards for cleaning windows. Congratulations to you, Charles, in coming up with this brilliant product. I cannot wait to see what other products you develop in the future, I highly recommend this product for any of the above uses and I am sure for the applications that I have not even thought of yet. Keep up the good work and set the pace for your next labour saving invention. Kind Regards, Ted Taylor ted@taylor.com.au

Congratulations on this great product, which we will continue to use and endorse,
Porsche Centre Brisbane Warwick Stanfield, General Manager

Hi Charles, "Porsche Centre Classic Care have been buying, selling, detailing and hiring classic A prestige cars since 1994. In late 2008 when we started using Magic Car Wash, not only did our detailer rave about the product for days, our cars really started to look a lot better. Even after the New Year break when we were closed they were still perfect & clean after a week. This is a truly excellent product!"
Thanks, Kind Regards **Clinton Centre Pty Ltd NSW, Richard Simons, Managing Director, Tel: 02-93197955, Fax: 02-93196399, Mob: 0419465855, email: richard@clinton.com.au web: www.clinton.com.au**

Hi Charles, I couldn't wait to get in this morning to send you this email to say "WOW". I really can't believe how easy your magic car wash is to use, and the results are outstanding, you should see how beautiful my red Saab 9000 now looks - amazing!! Thank you Charles for the magic car wash. I didn't have my car down to start, even though I thought it was very dirty, apart from the car looking fantastic I am very pleased with myself for having contributed to our water restrictions by using only 2 buckets of water. I couldn't help but think everybody should be washing their car like this and not wasting all that water down the drain! I was amazed how easily the ugly black soot was so effectively removed from the rims with magic car wash. The other thing I love about the car wash is the ability to repel dirt and dirt after the wash, it truly is fantastic. After washing the car I went to the shops and (I wasn't my imagination) everyone looked at my car cause it was dazzling! particularly the men noticed it. Cheers, Liz McKeen, BOKNE MEDIA PTY Secretary Cove Qld 4212 liz@bokenmedia.com.au Ph: 61 7 55779439 Fax: 61 7 55779433

Car Magic is just that - magic. It gets great results and is ideal for busy people like me because it is so quick and easy to use. It is also a great product because it helps to save water. Today every one is much more aware of the need to be use water wisely and using Car Magic only a bucket of water - no more hosing the driveway as well as the car! Dr Lesley Clark, Queensland, Australia. MP (Member of Parliament)

Thank you for your Magic Car Wash product. I own a Gloss Black Mercedes ML and have had to basically devote a day to cleaning and POLISHING the car, as streak marks were highly visible after traditional shampoo, hose and chamois use only. Now I can quickly have an immaculate streak free finish in 8 minutes. I have been so impressed I have demonstrated the car wash to many people and on many prestige cars including a Rolls Royce Silver Shadow that had post rain dust covering it. All demos have amazed the owners and impressed the used car sales managers who have seen it in action. This has to be the best car finish maintaining product around as it is portable, quick and efficient and works really well. Well done on bringing this to the market. Alan Chambers Director Localgold Pty 3d Armadale NSW 2350

Dear Charles, I used your product now for over two weeks. We keep hearing about the severe lack of water everywhere in this country and do you know the real reason? Not because we are washing more cars now but because the Government in the last 50 years have been so tight that they haven't wanted to fork out for any more dams. Did you know that in many Cities in Australia it is ILLEGAL to wash your car with a hose in the driveway of your own property?? This brings your product into the reason for my letter. I am a woman, I use your car wash nearly every day and I can't tell you how much it does for me!! I own a top of the line Kia and after spraying on your car wash and simply wiping it off it looked like a Porsche 928. I thought this is simply AMAZING!! 1 bucket of water does the trick! And something I can put in my handbag! This product cleans and protects the surface. No more window cleaner to purchase! No more expensive car wash to purchase! All in one! I am actually using it in the household too: Vinyl Floors, Mirrors, Reading glasses, Bench tops etc... It does not scratch, it is anti static, it simply saves you time, energy and water. Congratulations to You in inventing this brilliant product. I have already demonstrated it to a lot of people. As you know, I have lots of orders for your "Magic Car Wash". Please feel free to give my contact details to anyone who wants my opinion on this product.

Kind regards and happy cleaning, **Sabine Hoovy Ph: 0407 594 334 GMT + 10 hours Email: info@sasiascourt.com**
PO Box 270 Edge Hill QLD 4870 Australia P.S. Car you invent a fold up bucket?

*** WBR WATCHIT'S MAGIC** If you go by the premise that the less time you spend cleaning a car the more time you will have to drive it, then the curious named Magic for Cars and Porsches could be for you. Designed in Cairns, Australia, Magic boasts being the world's first and only pH neutral, non-petroleum "waterless" spray for vehicle exteriors and interiors. Given that hose pipe bans have already been introduced in some parts of the UK, a waterless car cleaner could be just the job for keeping your Porsche spotless this summer. Working on the premise that water itself doesn't wash cars, but the shampoo that it is mixed with, Magic puts both of these ingredients into one product; simply spray it on to paintwork, wipe with a damp chamois and your car is clean. Similarly, Magic can be used on wheels, exterior trim and interior. We tested the product on our long-term 944 and were very impressed with the results. If you want a sparkling finish you may still want to add a layer of wax after finishing but for a quick clean Magic worked superbly. Admittedly the company's website and the literature that accompanies Magic lacks the professional touch of its big budget competitors but we say that this innovative product is still well worth a try. One litre of Magic Car Wash costs about AU \$12.95, excluding shipping, and is available from www.carmagic.com.au

I have been a professional commercial cleaner for many many years and have found Spray & Wipe excellent for all types of cleaning. I have found it leaves no smears on anything. Which is what I found many of the other powerful cleaners tend to do. I am amazed at the product and highly recommend it for heavy duty cleaning. I now continuously use it, not only for the commercial jobs. **Margaret Robinson c/o Cairns Professional cleaners.**

I have used Magic Auto Spray & Wipe now for 6 months on our car and 4WD. It goes on easily and is extremely smooth coming off leaving the car shiny, clean and resilient. I also find the windscreen is almost like Rainex has been used on it, with the rain quickly flowing off therefore not needing the wipers in all circumstances. For any dirty 4WD it is excellent, removing dirt and grime with only a bucket of water. As we live in a unit and do not have access to a hose or a space to use a hose, it has been worth its weight in gold as we can still keep our cars clean and shiny. My wife likes to conservative with natural resources so loves the fact that there is such a water saving using this product. I can honestly recommend this product. **G Ken: gken@gmail.com**

Hi Linda, I finally got round to using the Carmagic on Sunday and I must say I am really impressed! I did have my reservation about cleaning my car with Carmagic and especially with out the aid of lots of water; however, I do believe I am converted. Carmagic is an absolute doddle to use; it is really quick and with the aid of a synthetic leather and microfibre cloth the paint work becomes smear free and with out unsightly watermarks. I will be buying some more soon. Thank you Andrew Piscoo, Managing Director HVMS UK
